Zuhr Jamaah winter 1:00 pm / Summer 2:00 pm

1st Juma 2:00 pm

2nd Juma 3:00 pm

18 degrees is the sun's angle below the horizon or sea level that helps define Subh-e-Sadiq i.e. Sahoor and Isha Salat timing. It is the beginning and end of the absolute night. It is the most accurate and safest time to start fajr and stop eating for fasting. According to the Majority of Ulama, Darul Ifta/ Shariah Board in all Muslim countries including Saudi Arabia, the US Naval Observatory (USNO), and the National Weather Service, astronomical dawn (Subh-e-Sadiq) and dusk (Beginning of Night) is computed at 18 degrees. For more details, please contact the fatwa board at Jamiah Islamiah Texas.

From this location, subtract 1 minute for every 17.40 miles towards the east. And add 1 min for every 17.40 miles towards the west.
